

Environmental Guide to the Internet

This handbook provides information for the best websites dealing with the preservation and protection of the environment, ecology, and conservation and offers more than 320 new listings and addresses. Written for environmental consultants, industry professionals, researchers, lawyers, educators, and students, it identifies the top 1,200 resources, including environmental discussion groups and mailing lists, newsgroups, newsletters, and journals. New features in this edition include 45 new newsgroups, including 30 from the newly created government hierarchy, and 200 new websites.
