

## The Amazing

After graduating high school, Don Evans was diagnosed with a brain tumor in the center of the brain, with only three doctors in the world capable of doing the surgery. If having the surgery he had about a 40% chance of living or had 6 months or less to live. After a twenty-one hour surgery, dying twice on the recovery table, he slips into his fifth coma for fourteen days. He awakes to being a complete vegetable for three months, not being able to read, write, walk or talk. He communicates by squeezing your hand, one means yes and two squeezes mean no. His parents are told he may never walk again. Read how he beats the odds, how his faith in God and love from family and friends and a lot of determination helps him come back.
