

## Number Search: 100 of the best number search puzzles (Volume 1)

Welcome to this fun collection of 100 number search puzzles. The rules of the game are simple, but the numbers can be tricky to spot in the grid. The numbers are hidden in the grid in a vertical, horizontal or diagonal direction, and either forwards or backwards. You must find them all in the grid, and cross them all off. If you enjoy wordsearch puzzles, then you should love numbersearch puzzles. The puzzles are a bit trickier than standard wordsearch puzzles as there are only ten possible characters in the grid, 0 - 9, as opposed to the 26 letters, A - Z, so numbers appear in the grid much more frequently than with a wordsearch, so there is more noise in the grid and hence the numbers can be harder to spot. This, coupled with the fact that numbers are less memorable than words, means that these puzzles can be pretty tricky. But with the same familiar rules from wordsearches, number search puzzles are a firm favourite for those looking for some puzzling fun. And all the solutions are included at the back so if you get stuck, you can check where each number is hidden in each grid!
